

## Reading History from Enterprise/Chicago Connection and the Internet

---

This is how Contact ID messages look in the Enterprise/Chicago Connection systems:

```

CHICAGO                BACK HISTORY ON ACCOUNTS                DATE : 02/12/02
                        -----                CEN.T: 15:06

```

This is how Contact ID messages look in the Secure Internet Services system:

*Subscriber Activity for Account M00001 (01/29/02 ~ 01/31/02)*  
*Subs. Name - TEST MLR CID*

Sig	Date	Time	Condition	Description	Entity Called	Phone Number	Remarks	Operator
*	01/30/02	10:48:43	58 BURGLAR ALARM	Auth. Name	N/A	N/A	E13400006	25
*	01/30/02	10:48:46	58 BURGLAR ALARM	Auth. Name	N/A	N/A	E13400005	25
*	01/30/02	10:48:50	58 BURGLAR ALARM	Auth. Name	N/A	N/A	E13400004	25

**The pertinent information from these two views is the following three signals:**

E 134 00 006, E 134 00 005, E 134 00 004

[Note the absence of the Zone Qualifier – this field is not necessary for decoding or defining Contact ID messages.]
